CARE & MAINTENANCE

NATURAL STONE

All of our bathroom products leave our factory in Tuscany pre-sealed. Since we do not like to paint the surface of our lovely stone with transparent paints or resins, we apply three coats of the highest possible level of protective penetrating sealant. Please bear in mind, however, that there is no sealer on the market that can make natural stone 100% stain-proof. The sealant creates a temporary barrier which slows down the absorption process. We therefore recommend that any potential staining agent is wiped off as soon as possible before it penetrates the surface.

RECOMMENDED PRODUCTS

Simply use a soft cloth or sponge and neutral soap or detergent such as FilaRefresh, always following the instructions given on the product packaging.

PRODUCTS TO AVOID

Please do not use aggressive cleaning products containing acid, bleach or limescale remover. These can cause irreparable damage to stone. Beware also of weak acids such as lemon, vinegar, coffee and tea. Avoid placing hot or blunt items on natural stone. If your stone is exposed to "hard water" where there is a high mineral content, you will need to take a little extra care as the cleaning properties of the detergent you use will be weakened. You will therefore need to clean a little more frequently so that lime scale and mould do not have the chance to develop. Remove any mark as soon as possible so that it is not absorbed into the stone.

WOOD

Products containing wood components are naturally sensitive to climatic variations. As a result, they may display slight movements, small cracks or changes in appearance, particularly during seasonal transitions or when exposed to heat sources that dry the air. Such minor movements or fissures are considered natural characteristics of the material and not defects, and therefore do not constitute valid grounds for claims or returns. Similarly, slight edge drops or small level differences are regarded as normal. Possible colour variations or differences in material characteristics are intrinsic to the natural origin of the materials and the artisanal nature of the workmanship.

We recommend cleaning with a soft, damp cloth.

RECOMMENDED PRODUCTS

Simply regularly wipe down any wooden elements with a damp sponge or soft cloth. For more profound cleaning, use a neutral detergent. To ensure small pools of water forming, always remove any traces of water.

PRODUCTS TO AVOID

Please do not use aggressive cleaning products containing bleach, ammonia or other harsh agents.

METAL

The brass components of our products are prepared using an artisanal process whereby they are burnished and brushed before receiving a coat of transparent paint. Elements in gunmetal are powder-coated. You will notice tonal and colour variations in our metal finishing. We prize this aspect of our products as it is testament to the human touch which plays a part in finishing and checking every piece we produce in our Tuscan factory.

RECOMMENDED PRODUCTS

Simply use a soft damp cloth. Always ensure no water accumulates on the metal surface as this can create a stain. Therefore, wipe off any excess water immediately.

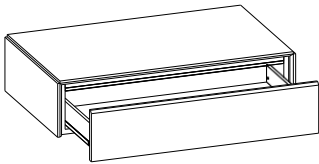

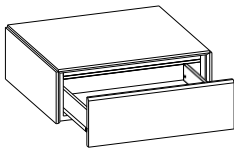

PRODUCTS TO AVOID

Avoid any cleaning products which could damage or erode the workmanship or texture of the metal components.

* NOTE: the measurements indicated refer exclusively to the internal width of the module and do not include the two external side panels. Each side panel is 1.9 cm thick. Therefore, the total external width of a single complete module is 45 + 3.8 cm (including both sides). For compositions of multiple adjacent modules, the shared sides are counted only once. For example, two adjacent 45 cm modules will result in a total width of 90 + 3.8 cm.

The dimensions provided are subject to dimensional tolerances in accordance with applicable technical standards.

front facing finish	HONED STONE Bianco Carrara, Crema d'Orcia Aura, Gris du Marais®, Pietra d'Avola, Silk Georgette®, Verde Antico, Verde Guatemala NATURAL WOOD Walnut Wood, Pale Oak, Coffee Oak, Grey Oak WOOD WITH TEXTURE BAMBOO (lines running horizontally and vertically), PLISSÉ, RAW (lines running vertically) Bianco Carrara, Crema d'Orcia Aura, Pietra d'Avola, Silk Georgette®, Verde Antico, Verde Guatemala NOTE: Gris du Marais® is available only with front facing in honed stone STONE WITH TEXTURE PLISSÉ, SPAGHETTI (lines running vertically) Walnut Wood, Pale Oak, Coffee Oak NOTE: Grey Oak is available only with front facing in natural wood

* NOTE: the measurements indicated refer exclusively to the internal width of the module and do not include the two external side panels. Each side panel is 1.9 cm thick. Therefore, the total external width of a single complete module is 90 + 3.8 cm (including both sides). For compositions of multiple adjacent modules, the shared sides are counted only once. For example, two adjacent 90 cm modules will result in a total width of 180 + 3.8 cm.

The dimensions provided are subject to dimensional tolerances in accordance with applicable technical standards.

Furniture lighting

FURNITURE LIGHTING

SALVATORI DESIGN CENTRE

GUIDE TO CREATING AN INTEGRATED LIGHTING SYSTEM

Order LEDs, control units, power supplies, sockets, and all connection elements separately, as needed.
To ensure the lighting system aligns with the purchased composition, Salvatori strongly recommends carefully following the instructions and recommendations outlined below.

1. HOW TO CALCULATE THE TOTAL WATTS FOR THE CONFIGURATION

For STANDARD drawers
 W_{tot} = total sum of the Watts of the LEDs in the configuration

For CUSTOM furniture
 W_{tot} = Watts per meter* (W/m) multiplied by the total length to be covered (L)

* NOTE: the value may vary depending on the light source

2. CHOOSE THE TRANSFORMER

The transformer's wattage must be at least 10% higher than the total wattage of the LEDs.

3. MATCH THE CONTROL UNIT

Match the DISTRIBUTOR (control unit) according to the diagram.

4. IF NECESSARY, MATCH THE Y-SPLIT CABLE TO INCREASE THE NUMBER OF CONNECTIONS TO THE CONTROL UNIT

Keep in mind that the Y-SPLIT CABLE controls both connected lamps simultaneously.

5. CHECK THE LED OPERATION

CONTROL UNIT - DISTRIBUTOR
No additional device required

IMPORTANT: Technical Note – Optional electrical components

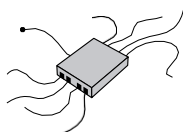

The price of the electrical component for the drawer module is calculated by adding the selected individual elements: light source, control unit/distributor, Y-split cable, any extension cable, transformer, and specific power adapter.

NOTE: in the case of a drawer + open compartment configuration (e.g. Hito collection), it is mandatory to include both the 8-output control unit and the 4-output BlueSmart module

AVAILABLE OPTION: LED lighting for open compartments can be managed via a dedicated app downloadable to your device

MIN.5 - MAX.25 cm

* Salvatori offers the option to include a filler panel in the same wood essence, marble, and finish as the main composition.

This solution is currently available for the Anima and Balnea collections and will gradually be extended to other ranges.

The aim is to provide greater design flexibility by filling the space at the end of a composition, thereby reducing the need for custom-made furniture elements.

The filler panel consists of a boxed structure (side panel with bottom and front) made of wood, flush with the drawer structure.

It is clad with a false front panel in wood or marble (smooth/natural or honed finish). Once the front is installed, the filler will be flush with the rest of the composition. This element also enables us to propose the composition for niche installations. In such cases, the marble side panel on that side will not be required. Sold individually – available for left or right side.

NOTE: Gris du Marais® is available only with front facing in Grey Oak

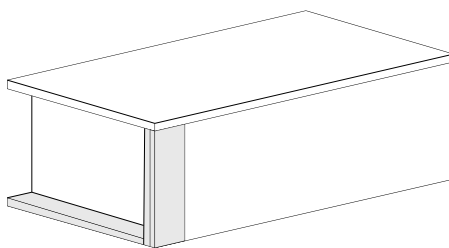

The exact dimensions of the packaging will be accurately defined only in the final phase of the order.

For compositions of 2 or more modules, please verify the actual number of packages and weight with our Customer Service.

The dimensions provided are subject to dimensional tolerances in accordance with applicable technical standards.

* These pieces can be combined with any countertop basin from the Salvatori collection.

NOTE: Gris du Marais® is available only with front facing in Grey Oak

This product requires a standard waste kit which can be purchased separately.

Salvatori recommends the Spaghetti bottle trap (SA.00003000-00.162):

₹ 91,000

** The measurements indicated refer exclusively to the internal width of

do not include the two external side panels.

The availability of stone textures and wood finishes for drawer fronts can be found on page 12 of this price list, within the dedicated Anima drawer section.

CUSTOMISED OPTION

Any variation in module length from the standard dimensions will incur a 30% surcharge based on the price of the next lower standard module.

Module height and depth cannot be modified.

Length can be customised within a range of 300 mm to 1200 mm.

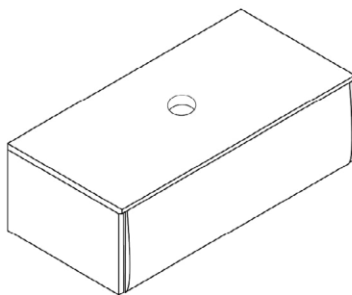

Custom versions are not available for lengths exceeding 1200 mm.

The exact dimensions of the packaging will be accurately defined only in the final phase of the order, and the indicated weights are estimated values to facilitate the calculation of shipping costs. The values refer to the single module described above. For compositions of 2 or more modules, please verify the actual number of packages and weight with our Customer Service.

The dimensions provided are subject to dimensional tolerances in accordance with applicable technical standards.

ANIMA COLLECTION

YABU PUSHELBERG

CONFIGURATIONS

Anima modules are suitable for both bathroom and living spaces and can be freely combined to meet design requirements.
Each composition includes two natural stone side panels, each 1.9 cm thick.
The total length of a composition is calculated by summing the length of the modules plus the two side panels.
Example: composition with 2 modules of 60 cm and 1 module of 90 cm
Total length = 1.9 + (60 × 2) + 90 + 1.9 = 213.8 cm

For more detailed information please see page 12.

dimensions (cm)	custom-made	custom-made	custom-made	custom-made
packaged weight (kg)	A: 49	A: 38	A: 49	A: 38

* This product is suitable for use in bathroom and living environments.

NOTE: Gris du Marais® is not available for L105 and L120 cm modules

** The measurements indicated refer exclusively to the internal width of the module and do not include the two external side panels.

The availability of stone textures and wood finishes for drawer fronts can be found on page 19 of this price list, within the dedicated Balnea drawer section.

CUSTOMISED OPTION

Any variation in module length from the standard dimensions will incur a 30% surcharge based on the price of the next lower standard module.

Module height and depth cannot be modified.

Length can be customised within a range of 300 mm to 1200 mm.

Custom versions are not available for lengths exceeding 1200 mm.

The exact dimensions of the packaging will be accurately defined only in the final phase of the order, and the indicated weights are estimated values to facilitate the calculation of shipping costs. The values refer to the single module described above. For compositions of 2 or more modules, please verify the actual number of packages and weight with our Customer Service.

The dimensions provided are subject to dimensional tolerances in accordance with applicable technical standards.

BALNEA COLLECTION

ELISA OSSINO

CONFIGURATIONS

Balnea modules are suitable for both bathroom and living spaces and can be freely combined to meet design requirements.
Each composition includes two natural stone side panels, each 1.9 cm thick.
The total length of a composition is calculated by summing the length of the modules plus the two side panels.
Example: composition with 2 modules of 60 cm and 1 module of 90 cm
Total length = 1.9 + (60 × 2) + 90 + 1.9 = 213.8 cm

For more detailed information please see page 19.

* The Punto L70H30 modular drawer is suitable for bathroom, bedroom and living room contexts. Modules can be freely configured to meet specific design requirements. As an alternative to natural stone, the top is also available in HPL Graphite, in which case its thickness will be 12 mm rather than 20 mm. The availability of stone textures and wood finishes for drawer fronts can be found on page 30 of this price list, within the dedicated Punto drawer section.

CUSTOMISED OPTION
A surcharge of 40% of the standard price will be applied to customised lengths. The height and depth cannot be modified.

The dimensions provided are subject to dimensional tolerances in accordance with applicable technical standards.
