

CATALANO

Listino 2026

Material.

Catalano invests and only produces in Italy, to ensure an unimitable standard of excellence using the best raw materials. It also has an innovative plant for recycling ceramic waste, which represents a real revolution in the production sector. The highly energy efficient plant is capable of fully recycling industrial process waste, already derived from the processing of natural raw materials, while maintaining a sustainable impact on the environment.

Smart Manufacturing

INDUSTRY 4.0

The company evolution is the result of an innate attention to technological innovations able to face the demand of increasingly challenging and globalized markets. Resource management, design, modelling and production phases are organized using highly digitalized and automated systems. Catalano uses smart manufacturing procedures for maximum optimization of production processes. The increasing investment in robotics has led to a very high level of automation and precision, leaving to the expertise of our skilled craftsmen the final touch of product improvement.

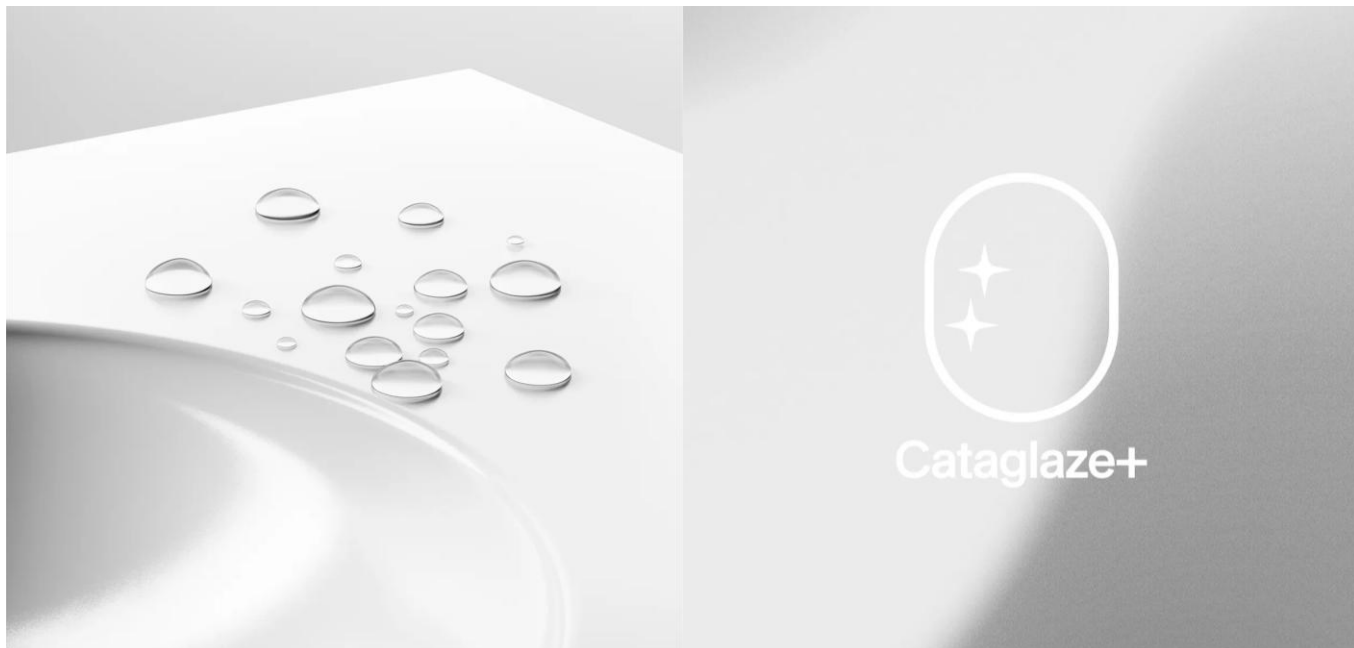

Made in Italy

All Catalano product are 100 made in Italy, because they are all conceived, designed and manufactured in our sole global production site near Rome. MAde in Italy logo is hot stamped in unalterable way to guarantee the origin of our products.

newflush®

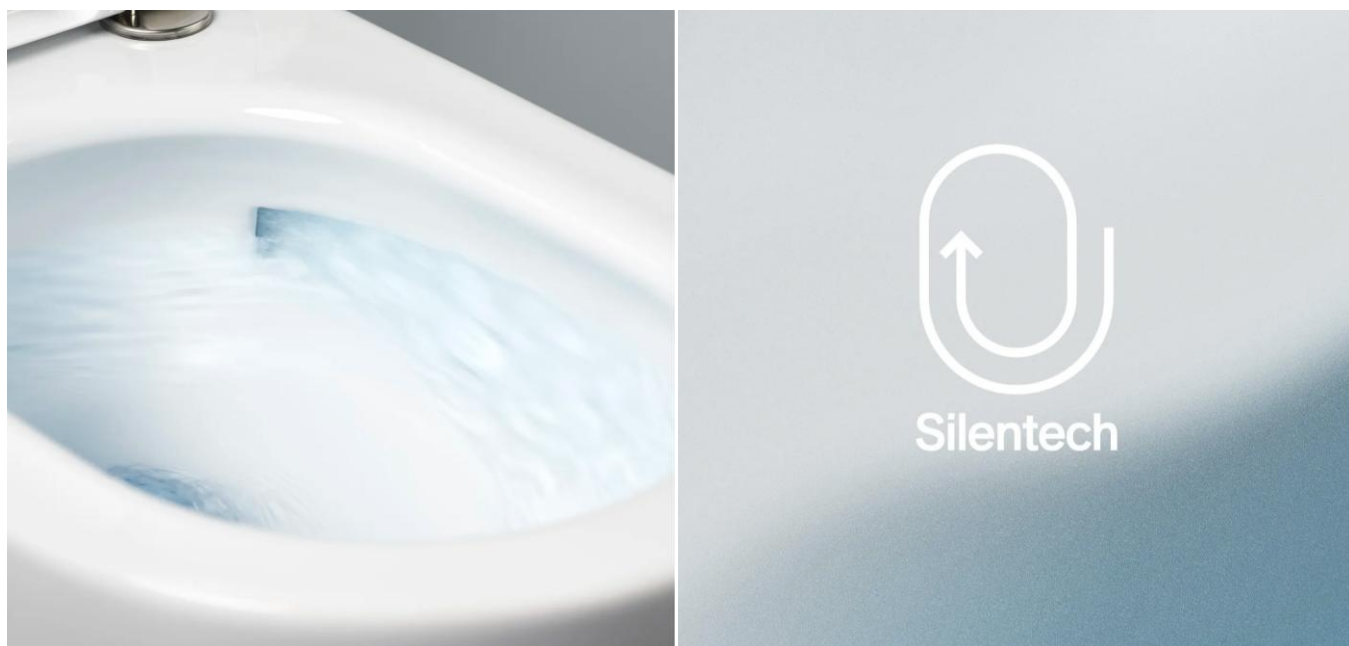

MADE
CONCEIVED • DESIGNED • PRODUCED
IN ITALY

Cataglaze+ Silver Titanium is an innovative treatment that not only reduces limescale deposits but makes cleaning ceramic sanitary ware easy through its powerful antibacterial action against germs and bacteria. The effectiveness of the new formula is ensured by the presence of silver and titanium ions in the blend. Antibacterial action is ISO 22196 certified with an effectiveness of 99,99%.

Silentech

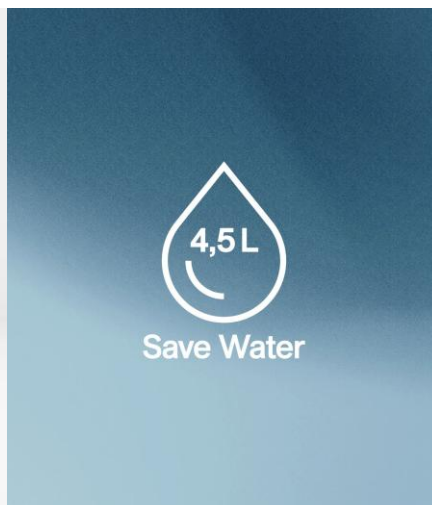

The system Silentech, invented by Catalano, is the most advanced rimless flushing system on the market. The absence of a surrounding rim, where germs and bacteria tend to congregate, guarantees maximum hygiene and makes the job of cleaning easier. The new system has many advantages: a new design that optimizes performance in terms of hygiene, noise reduction and sustainability; it gives the wc a contemporary aesthetic; the swirling flow of water sets off a powerful mechanical action over the surface for impeccable cleanliness and so less need for chemical detergents; less noise; less water consumption.

Antibacterial

At Catalano, we believe that the quality of our products should go beyond design and functionality. That's why we are constantly committed to researching solutions that enhance the durability and hygiene of ceramic surfaces

Save Water

Catalano's flushing systems have been designed to use considerably less water (4.5 litres) than traditional systems which employ twice as much. This important difference translates into significantly lower water consumption, thereby reducing the impact on the water supply and conserving limited water resources. A fundamental action for environmental sustainability and a policy Catalano adopts every day across its entire production chain.

Soft Close

The Soft Close closing system is a function that allows the seat to close slowly and in a controlled manner, avoiding sharp noises and accidental damage. Besides closing quietly, it offers more comfort and safety.
