* Honed tiles are available as follows to match exclusively with Infinito.

Infinito tiles are sold in minimum batch lots and all orders are calculated by converting the square metres requested and rounding up to arrive at the minimum batch lot(s) required to meet the request.

THICKNESS AVAILABILITY. Gris du Marais® honed is supplied with a variable thickness ranging between 13 mm and 16 mm.

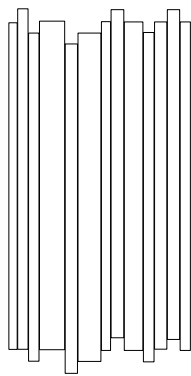

THICKNESS CONSISTENCY. The thickness of the tiles will be determined during the final production phase and will fall within the specified range. All tiles within the specific order will be produced with the same thickness.

DIMENSIONAL TOLERANCE. In compliance with tolerance standards (+1/-1 mm), the thickness of the tiles will never be less than 13 mm or exceed 17 mm.

Measurements may be subject to slight variances in accordance with EC tolerance standards.

* In the interests of sustainability and minimising waste, tiles are supplied in varying lengths, some of which may be slightly shorter than indicated above. This does not impact the final aesthetic in any way. Lithoverde® contributes LEED points, awarded to increase the level of architectural sustainability of a building. It is available in two configurations:

- tiles are provided in a range of lengths from 310 to 1220 mm, subject to availability (the classic Lithoverde® solution, designed to optimise offcuts)
- uniform tile size (610 × 305 mm)

Lithoverde® tiles are sold in minimum batch lots and all orders are calculated by converting the square metres requested and rounding up to arrive at the minimum batch lot(s) required to meet the request.

NOTE: a surcharge of 15% of the list price will be added to orders for quantities under 5 mq

Measurements may be subject to slight variances in accordance with EC tolerance standards.

crate dimensions (cm)	100 × 100 × 120

* Patchwork is provided on a mesh. It consists of preassembled “sheets” with an approximate size of 350 × 350 mm. Thickness variations for a three-dimensional effect: the tiles will be available in varying thicknesses (from a minimum of 9 mm to a maximum of 13 mm) depending on the finish. This intentional thickness variation will help add depth to the composition. Limited variation of textures: please note that it is not possible to select specific textures. The composition ranges from a minimum of 5 to a maximum of 9 different finishes.

Measurements may be subject to slight variances in accordance with EC tolerance standards.

It can be combined with a border in honed tiles to replicate the characteristics of the original Japanese matting.
Where Stone Tatami is laid using only the textured tiles, is without a honed border, it can be installed in the following ways: orthogonal or running laying pattern
Stone Tatami tiles are sold in minimum batch lots and all orders are calculated by converting the square metres requested and rounding up to arrive at the minimum batch lot(s) required to meet the request.

Measurements may be subject to slight variances in accordance with EC tolerance standards.

TRATTI

kg per crate	672	638
crate dimensions (cm)	105 × 96 × 80	105 × 96 × 80

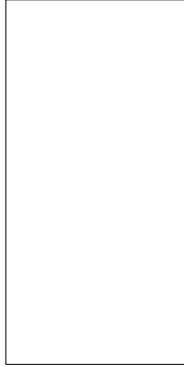

* Tratti comes complete with metal inserts as follows:
- in midnight black (PN) with Bianco Carrara and Pietra d'Avola Cotone and honed Gris du Marais®
- in anodised gold (PO) with honed Gris du Marais® and Pietra d'Avola
Tratti tiles are sold in minimum batch lots and all orders are calculated by converting the square metres requested and rounding up to arrive at the minimum batch lot(s) required to meet the request.
NOTE: the depth of the metal insert varies depending on the thickness of the tile. The metal inserts may contain slight colour variations due to the anodisation process used, however these should be considered an intrinsic characteristic rather than any form of defect.

Measurements may be subject to slight variances in accordance with EC tolerance standards.

THICKNESS AVAILABILITY

Gris du Marais® honed is supplied with a variable thickness ranging between 13 mm and 16 mm.

THICKNESS CONSISTENCY

The thickness of the honed Gris du Marais® tiles will be determined during the final production phase and will fall within the specified range. All the tiles of the honed Gris du Marais® within the specific order will be produced with the same thickness.

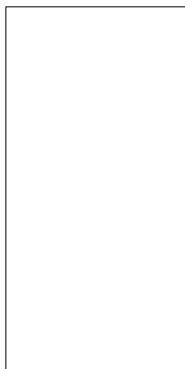

DIMENSIONAL TOLERANCE

In compliance with tolerance standards (+1/-1 mm), the thickness of the honed Gris du Marais® will never be less than 13 mm or exceed 17 mm.

Measurements may be subject to slight variances in accordance with EC tolerance standards.
